built-in lamp

The Dexxo Pro io drive is a comprehensive solution for automating garage doors. Depending on the conditions of use, you can adapt the installation to your needs. Choose a belt to enjoy the quiet operation of the drive in a home garage or use a reinforced chain, which is designed for intensive use of the door, up to 90,000 cycles. All settings are pre-programmed, but you can customize the operation of the entire system with 13 available parameters.
