

Fit-Zag

- ✓ Frame: extruded aluminium
- ✓ Net: fibreglass / PVC (standard)
- ✓ Width: up to 240 cm
- ✓ Height: up to 260 cm
- ✓ Can be installed in large niches
- ✓ Profiles painted in all RAL colours

The Fit-Zag mosquito net is designed for large niches, up to 240 cm wide, but can also be used for narrower passages. It can be mounted in or on the niche using an additional profile. Its distinguishing feature is that it can be fitted between the window and the external roller shutter.

The presence of the Fit-Zag mosquito net does not limit the door's functionality. It uses a sliding profile, in which the handle is replaced by a groove in the profile. It closes magnetically.

The mosquito net profiles can be painted in any RAL colour.
