

Trickle vent

✓ A two-stream air ventilator, the flow of which depends on the relative humidity in the room

✓ It also allows for manual closing, causing only minimal airflow

✓ Air flow at 10 Pa: 5–30 m³/h

✓ Acoustic attenuation: D_{n, e, w} = 32 dB

In the offer you can find a few different options of trickle vent for use in uPVC windows, available also with manual adjustment.
